Final Office Action on the Merits

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Status of the Application

2. Claims 1 and 4-60 are pending in the present application. Claims 31-59 stand withdrawn from further consideration as being drawn to a nonelected invention. Claims 1 and 4-30 stand rejected as indicated below.

Claim Objections

3. Claims 4 and 5 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

The instant claims recite R₁ is C₁₋₄₀ hydrocarbon-based radicals whereas parent claim 1 recites C₈₋₄₀.

Claim Rejections - 35 USC § 112

4. The rejection of claims 1 and 4-30 under 35 USC 112, second paragraph is withdrawn.

Claim Rejections - 35 USC § 102

5. The rejection of claims 1, 4-10, 12-15, 25-27 and 30 under 35 USC 102(e) over Thunemann (US 6,395,284) as evidenced by Aldrich (1996-1997) is withdrawn.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1, 4-30 and 60 are rejected under 35 U.S.C. 103(a) as being unpatentable over Philippe et al. (WO 99/49837, English translation US 6,656,458).

Philippe et al. teaches polyaminoacid derivatives and their use in treating keratinous fibers (see the entire article, especially Abstract, col. 1, line 53 – col. 2, line 44; Examples 1-16). The reference teaches compositions containing between 0.001% and 30% of the compounds and utilization in shampoos with the addition other cosmetically or dermatologically acceptable additives such as antimicrobial agents and anti-dandruff agent (see col. 3, lines 55-63; col. 4, lines 34-41).

The instant claims differ from the reference by reciting the treatment of seborrhea of the skin and scalp, dermatological disorders associated with seborrhea and dermatological disorders associated with *Propionibacterium acnes* and

Propionibacterium granulosum. However, addition of the prior art compound to shampoos as taught by Philippe would inherently treat the scalp for any disorders associated with seborrhea as recited by the instant claims. Therefore, the claimed invention is prima facie obvious.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
